

# THE LONG MARCH INTO SPACE

1 x 60' **HD**

Inside a spaceship at Jiuquan Launch Facility, three men sit on top of 500 tons of liquid fuel. A controlled explosion will blast them three hundred kilometers into space, and into the record books.

This is China's next great leap into space - an historic mission where one Taikonaut will become the first Chinese to walk outside the space- craft.

Now camera crews have gained unprecedented access behind the scenes of this top secret mission. Follow astronauts, rocket scientists and engineers as they count down to a historic mission that may one day propel mankind's return to the moon.
