

HOW MANY CHRISTMAS LIGHTS?

1 x 60' **HD**

Christmas just isn't Christmas without the twinkle of lights to warm the heart. Ordinary trees become special Christmas trees with the addition of lights and plain gardens become magical wonderlands when donned with sparkling lights.

Australian father David Richards made global headlines when he decorated his family home with more than 500,000 Christmas lights, winning the 2013 Guinness World Record™ title.

This year, the challenge is on – to install more than one million Christmas lights in the central business district of Australia's national capital city and capture another Guinness World Record™.

We will follow David on his quest as he travels to China to purchase the lights, and we will experience the frustrations and sense of achievement as lighting architects, electrical engineers, designers and an army of volunteers work towards installing a record-smashing number of lights in a single display in Canberra city.

With over 200,000 visitors expected to visit the lights display, this documentary will warm your heart this Christmas season!
