

# DISCOVERING ANIMAL BEHAVIOUR

3 x 60' or 30 x 5' **HD**

SCIENCE

This multi-award winning series delves into animal behaviour around the world. Exquisitely shot, each episode is devoted to recent discoveries in ethology and to understanding the how and why of the behavior of different species of animals in their daily lives.

Segments are grouped with a geographical theme and cover fascinating topics such as the paradox of blue eggs, infanticidal behaviour in bears, the power-play for wolf dominance of the pack, the seductive song of the toad, the cannibalism of tarantulas and the chemical communication of the snow vole.

*\*Award Best Scientific Documentary in XXV INTERNATIONAL BIENNIAL OF SCIENTIFIC FILM OF RONDA.*
