

# ANTARCTICA DREAMING

1 x 60' **HD**

Imagine a world coloured by ice and fire, carved by hurricane force winds, weighted by glaciers, carpeted by wildlife perfectly adapted to freezing conditions and winters of perpetual darkness: a world essentially inhospitable to man, still largely unexplored. It is the White Continent... Antarctica.

Featuring the Antarctica Peninsula, South Georgia and the Falkland Islands, Antarctica Dreaming documents all major Antarctic and sub-Antarctic animals. Their lifecycles captured over an entire season of varying climate conditions, from wild white blizzards to fire red sunsets reflected in a glassy sea.

Some of the fascinating creatures in the film include Gentoo, Adelie and Chinstrap Penguins, King and Rockhopper Penguins, Weddell, Crabeater and Leopard Seals, Fur and Elephant Seals and a broad montage of seabirds.

Filmed by a world-class team including Emmy Award winner David Hannan, Antarctica Dreaming is sure to mesmerise, amuse, entertain and educate.
