

MY FIRST TATTOO

1 x 60' **HD**

Tattoos are everywhere. It seems like everyone wants one. And their very car-crash nature means that they make for great TV. My Tattoo Addiction told the stories behind tattoos and the people whose lives they've changed; Tattoo Fixers tells us funny stories about tattoos that have gone horribly wrong – for a post-watershed audience.

But what's missing from current tattoo TV is the anticipation and transgression that having a tattoo still represents. Because what's really fascinating about tattoos are the feelings and the fear behind having your first one.

Using the expertise and style from intimate documentaries like Underage & Gay and My Tattoo Addiction, this documentary meets people about to have their first tattoo. We hear their reasons behind it, from ink-crossed lovers, to BFFs, mid-life crisis and superfans. We'll follow them to the studio and share their experience, then we'll be with them as they reveal their creation to the world.
